

You Know Your Child Best

What Am I Looking For?

Look inside to learn what to look for as your child develops. Not reaching these milestones, or reaching them much later than other children, could be a sign of a developmental delay.

Concerned About Your Child's Development?

Talk to your child's doctor.

Looking for free developmental screening?

the Spokane Regional Health District's Infant Toddler Network.

ASK NOW

Babies & Kids Can't Wait

The journey of your child's
early years includes many
developmental milestones for
how he or she plays, learns,
speaks, and acts.

Talk with your child's doctor
about these milestones.

For parents of children from
birth to three years.

Your Child's Early Development is a Journey

Check off the milestones your child has reached and share your child's progress with the doctor at every visit.

START
HERE

0-6 MONTHS

- Lift head and chest while on stomach
- Smile, follow movements by turning head

- Quiet easily when comforted
- Make gurgling or cooing sounds

- Startle or cry at sudden loud noises

- Reaches for a toy
- Begins to sit without support

- Responds to own name
- Makes eye contact
- Copies sounds

6 MONTHS

- Strings vowels together when babbling ("ah, eh, oh")

1 YEAR

- Uses simple gestures such as shaking head for "no" or waving "bye bye"

- Points to a picture
- Transfers objects between hands

3 YEARS

- Pulls up to stand
- Says "mama", and "dada"

- Walks alone

- Plays simple pretend, such as feeding a doll

- Knows what ordinary things are for, i.e. phone, brush, spoon

- Moves to music

- Can pick up small objects

- Says sentences with two to four words
- Kicks a ball

2 YEARS

- Follows simple instructions such as picking up toys
- Can run

- Gets excited when with other children

- Climbs, balances well
- Carries on a conversation using two to three sentences

- Shows affection without prompting

- Can hold a crayon

- Plays make-believe with dolls, animals and people
