You Know Your Child Best

What Am I Looking For?

Look inside to learn what to look for as your child develops. Not reaching these milestones, or reaching them much later than other children, could be a sign of a developmental delay.

Concerned About Your Child's Development?
Talk to your child's doctor.

Looking for free developmental screening?

srhd.org/ask-now.asp to learn more about Spokane's referral and evaluation resources.

Have further questions? Call Spokane Regional Health District's Infant Toddler Network 509.324.1651

Developmental milestones and other information adapted from U.S. Centers for Disease Control and Prevention and from Caring for Your Baby and Young Child: Birth to Age 5 (American Academy of Pediatrics, 2009) and Bright Futures: Guidelines for Health Supervision of Infants, Children and Adolescents (AAP, 2008)

The journey of your child's early years includes many developmental milestones for how he or she plays, learns, speaks, and acts.

Talk with your child's doctor about these milestones.

For parents of children from birth to three years.

Your Child's Early Development is a Journey

Check off the milestones your child has reached and share your child's progress with the doctor at every visit.

Can run

Follows simple instructions such as picking up toys

Gets excited when with other children
