

Help Bridge the Gap in Autism Diagnoses in Grays Harbor!

Center of Excellence (COE) certification enables eligible providers to diagnose autism in Medicaid-covered pediatric patients. Eligible clinicians include MDs, DOs, ARNPs, PhD/PsyD clinical psychologists, NDs, and PA-Cs serving children and youth through age 20.

The Need:

- Grays Harbor County's SMART Team currently has **more than 100 children** waiting for autism evaluations.
- At The SMART Team's current rate of four evaluations per month, families are waiting **up to two years** for answers.
- We've had to stop taking referrals—because there aren't enough trained providers.

How You Can Help:

- Get COE certified with a free one-day virtual training.
- Gain specialized skills in autism evaluation and support.
- You have the options to see only your own established patients or take referrals from others.

Live Zoom Training Date:

**Friday, May 16, 2025
8:30 to 4:30**
